

People of Faith for International Family Planning

Each year in developing countries, more than half-a-million women die from pregnancy-related causes, millions of women suffer serious health complications, and 4 million newborns die in the first month of life. We have the power to stop this tragedy through increased U.S. funding for family planning and reproductive health services. As people of faith, we call on public officials to ensure that our government increases our investment in services that save lives, improve women's health, and enable women and families to have a better life.
